UPGRADES OF ARFF TRAINING CENTER LEXINGTON BLUEGRASS AIRPORT

Project Overview

Kirila Fire was contracted to provide a major overhaul and upgrade of the existing Symtron Systems Aircraft FireTrainer® A-2000 FST (Fuel Spill Trainer) and SAFT (Specialized Aircraft Fire Trainer) located at the Lexington Bluegrass Airport. This project was primarily funded through the FAA Airport Improvement Program. The scope of the effort included the addition of additional fire scenarios, and other training features. It also included the upgrade of the system control hardware and software.

FireTrainer® is a trademark of United Technologies
